

# Maintenance Report

## Sensor Malfunctions:

- **Temperature Sensor: Malfunction detected**
- **Humidity Sensor: No malfunctions detected**
- **Smoke Sensor: Malfunction detected**

## Report data:

### **Temperature:**

- Warning: Signal Interference
- Description: The wireless sensor is experiencing signal interference from other wireless devices, which is causing inaccurate readings. This could be due to a high number of devices operating in the same frequency range or physical obstacles that are blocking the signal

### **Smoke:**

- Warning: Signal Interference
- Description: The wireless sensor is experiencing signal interference from other wireless devices, which is causing inaccurate readings. This could be due to a high number of devices operating in the same frequency range or physical obstacles that are blocking the signal
